

Insulated Electrical Wire

This plastic coated wire is suitable for electrical and mechanical applications. The durable plastic coating provides insulation and protection against abrasion, corrosion, and environmental factors.

Product Overview

High-Performance Insulated Wire

This high-quality plastic coated wire is engineered for versatility across various electrical and mechanical applications. Featuring a durable insulation layer, it offers superior protection against abrasion, corrosion, and harsh environmental factors. Its chemical and solvent resistance ensures reliable, long-lasting performance in demanding industrial and electronic assembly environments.

Physical Characteristics

Insulation Material	Plastic Coating
Flexibility	High flexibility for ease of handling

Application & Features

Primary Applications

- Wiring harnesses
- Electronic assemblies
- General-purpose electrical connections

Key Benefits	Abrasion Resistant, Corrosion Resistant, Chemical Resistant, Solvent Resistant
--------------	--

Availability

Customization Options

Multiple Colors • Various Gauges
