

# Insulated Food and Beverage Container Set

These insulated containers are designed to maintain the temperature of both food and beverages. With a double-walled design and vacuum insulation, they minimize heat transfer, making them ideal for travel, office, or outdoor use.

## ADDITIONAL IMAGES

## Product Overview

### Premium Insulated Container Series

This versatile food and beverage container set features a high-quality double-layer design constructed with food-grade SUS304 stainless steel. Built for durability and performance, the containers offer excellent scratch resistance and reliable thermal retention, keeping contents warm for extended periods. Ideal for office use, travel, or outdoor activities, these containers provide a stylish and functional solution for on-the-go nourishment.
