

Insulated Fork Terminals

Insulated spade terminals, also known as fork terminals, provide a secure connection for electrical wiring. The insulation offers protection against electrical shock and short circuits, and they are available in various colors to indicate wire gauge sizes.

Product Overview

Insulated Fork Terminals

These insulated spade terminals, commonly referred to as fork terminals, are engineered to provide secure and reliable electrical connections. The distinctive forked tongue design allows for quick installation by slipping under screw heads or studs without requiring the fastener to be completely removed. Featuring protective insulation, these terminals help prevent electrical shocks and short circuits, making them a safe and efficient choice for professional wiring tasks.

Technical Specifications

Terminal Type	Fork Terminal (Spade Terminal)
Insulation	Yes
Color Coding	Red, Blue, Yellow

Applications

Suitable Industries

- Automotive
- Marine
- Industrial Electrical
