

Insulated Service Line Tension Clamp

This tension clamp is used to anchor and tighten insulated service lines on poles or walls. The clamp is made of weather-resistant and anti-UV material with high mechanical strength for durability.

Product Overview

FHA205 Tension Clamp

The FHA205 tension clamp is engineered for anchoring and tightening insulated service lines on both poles and walls. Designed for durability, it features weather-resistant and anti-UV materials that maintain high mechanical strength in various environmental conditions. This clamp simplifies field operations with an easy installation process that requires no additional tools and ensures no loose parts fall off during setup.

Technical Specifications

Type	Conductor Size (mm ²)	Failure Load(kN)	Pack (pcs)
FHA205-16-70	16-70	2	80

Technical specifications for the FHA205-16-70 model.

Standard	NF C 33-042
Conductor Size Range	16 mm ²
Failure Load	2 kN
Packaging	80 pcs

Features

Key Benefits

- Easy installation without additional tools
- No loose parts during installation
- Weather-resistant material
- Anti-UV protection
- High mechanical strength

Application

Suitable Mounting Surfaces	Poles, Walls
