

Insulator Cap with Pin Ball and Spring Clip

This set includes an insulator cap, pin ball, and spring clip. These components are designed for securing and stabilizing electrical insulators, providing reliable performance.

Product Overview

High-Voltage Insulator Fitting Set

This insulator fitting set includes a cap, pin ball, and spring clip, designed for reliable operation in high-voltage electrical systems. Engineered for durability, the components are constructed from malleable or ductile iron with a hot-dip galvanized finish to resist corrosion and environmental stress. This assembly ensures secure stabilization and proper alignment for power transmission lines and substation equipment.

Technical Specifications

Tensile Strength

70 KN

Tensile Strength

Material	Malleable / Ductile Iron
Surface Treatment	Hot Dip Galvanized
Model Type	XP-70
Color	Silver

Application & Usage

Primary Applications	High Voltage Insulators, Power Transmission Lines, Substations, Electrical Equipment
----------------------	--

Logistics & Commercial

Shipping Options

- Air Freight
- Sea Freight
- Trucking
- International Courier (TNT, DHL)

Payment Terms

Term	Detail
Standard	30% T/T in advance, 70% after viewing B/L
Accepted Methods	T/T, L/C, Credit Card, Western Union

Packaging

Export fumigation-free wooden case lined with plastic film (or per buyer requirement)
