

Integral Drill Rod

This integral drill rod is designed for precision drilling applications. It features advanced flute geometry for efficient chip evacuation and reduced heat buildup.

Product Overview

High-Performance Integral Drill Steel

This integral drill steel is engineered for high-precision drilling applications across a variety of materials. Constructed from premium-grade materials, it offers exceptional durability, wear resistance, and extended tool life. The design incorporates advanced flute geometry to ensure efficient chip evacuation and reduced heat buildup, resulting in clean and accurate holes for professional drilling requirements.

Technical Features

Performance Benefits

- Efficient chip evacuation
- Reduced heat buildup
- Clean and accurate hole formation
- Extended tool life

Application Suitability

Precision Drilling • Versatile Material Compatibility

Key Features

High-Performance, Premium-Grade Materials, Advanced Flute Geometry, Wear Resistant
