

Integrated Kitchen Ventilation System with LED Lighting

This kitchen ventilator is designed for efficient smoke and odor removal. Constructed with stainless steel and tempered glass, it features touch-sensitive controls, integrated LED lighting, and adjustable fan speeds.

Overview

Professional Kitchen Ventilation Solution

This integrated kitchen ventilation system is engineered for efficient smoke and odor removal in modern culinary environments. Constructed with premium stainless steel and tempered glass, it combines durability with a sleek aesthetic that integrates seamlessly into contemporary kitchens. The system features advanced multi-layered filtration, touch-sensitive controls, and integrated LED lighting for enhanced visibility and ease of use.

Technical Features

Filtration Type	Multi-layered filtration
Control Interface	Touch-sensitive controls
Integrated Lighting	Yes
Operational Noise	Quiet operation
Fan Speed Settings	Adjustable

Construction & Design

Build Materials

Stainless Steel • Tempered Glass

Design Aesthetic	Modern/Contemporary
