

Integrated LED Stone Light for Outdoor Use

This integrated LED lighting fixture is designed for outdoor installation within stone or concrete structures. It features a linear array of closely spaced LEDs, providing bright, even illumination.

Product Overview

Integrated Architectural Lighting

This high-intensity LED lighting fixture is engineered for seamless integration into outdoor masonry, such as retaining walls and stone benches. Designed for both aesthetic enhancement and safety, the fixture provides a consistent, bright linear illumination across surfaces. Its durable construction ensures long-term weather resistance, making it an ideal choice for professional landscaping and urban design projects.

Technical Specifications

Mounting Method	Flush-mount
Light Temperature	Cool White
Voltage Requirement	Low voltage
Materials	Stainless Steel, Aluminum, Weather-resistant Housing

Key Features

Performance Highlights

1 Linear

LED Array Type

Applications

Recommended Environments

- Retaining walls
- Outdoor stone benches
- Concrete structures
- Landscape safety illumination
