

# Integrated Solar LED Street Light

This LED solar street light features an integrated solar panel for energy efficiency and automatic operation. It is designed for outdoor use, providing illumination for streets, pathways and other outdoor areas.

## Product Overview

### Integrated Solar LED Street Light

This integrated solar street light is designed for efficient, autonomous outdoor illumination. It features a built-in solar panel that charges the internal battery during daylight hours, enabling automatic operation from dusk until dawn. With a durable, weather-resistant housing and included mounting bracket, this solution is ideal for streets, pathways, and general outdoor areas where reliable, wire-free lighting is required.

## Key Features

Installation	Wall Mount, Pole Mount, Wireless
Power Source	Solar Energy
Operation Mode	Automatic (Dusk-to-Dawn)

## Durability & Environment

**Weather Resistance**  
All-Weather Design • Outdoor Rated

## Technical Specifications

Design	Integrated Solar Panel
