Product Overview

Integrated Solar Lighting Solution

This all-in-one integrated solar street light combines high-efficiency LED lighting, a solar panel, and a battery system into a single, durable unit for standalone operation. Designed for reliability, it features an aluminum alloy construction that ensures excellent heat dissipation and corrosion resistance in outdoor environments. The system simplifies installation and maintenance, automatically managing lighting cycles from dusk to dawn with adjustable brightness settings for optimal energy conservation.

Technical Specifications

Power Rating

60 W
System Power

Light Unit Dimensions	1078mm x 426mm
-----------------------	----------------

Solar Panel Dimensions	1070mm x 398mm
------------------------	----------------

Construction & Materials

Integrated Components

- Aluminum enclosure
- Solar panel
- LED chips
- Battery
- Mounting bracket

Housing Material	Aluminum Alloy
------------------	----------------

Features & Benefits

Typical Applications

Streets • Parking Lots • Pathways • Outdoor Areas

Key Features

Dusk-to-Dawn Automation, Adjustable Brightness, Corrosion Resistant, Easy Installation, Energy Efficient
