

Intelligent Air Purifier for Home and Office

Intelligent air purifier designed for improving indoor air quality. Features include multi-stage filtration, removing dust, pollen, smoke, and odors.

Overview

Clean Air Solutions

The YQ-2280 Intelligent Air Purifier is a sophisticated solution designed to optimize indoor air quality for both residential and office environments. It utilizes a multi-stage filtration system to effectively eliminate airborne contaminants, including dust, pollen, smoke, and unpleasant odors. By integrating advanced sensors for automatic operation and real-time air quality monitoring, this device ensures a consistently healthier atmosphere with minimal manual intervention.

Technical Specifications

Model Number	YQ-2280
Key Filtration Targets	Dust, Pollen, Smoke, Odors

Features

Smart Capabilities

- Automatic operation based on sensors
- Real-time air quality monitoring
- Multi-stage filtration process

Suitable Environments

Residential • Office
