

Intelligent Hydraulic Excavator

This hydraulic excavator features an intelligent system that is energy-saving and efficient. It also has a 2D slope finishing system that provides construction accuracy and enhances security.

Product Overview

Intelligent Hydraulic Excavator

The XE215DI is a robust and versatile construction machine engineered for demanding excavation tasks in infrastructure and mining applications. It features a powerful hydraulic system designed for high-efficiency material handling and superior digging force. With an emphasis on stability and operator comfort, this excavator ensures consistent performance on a variety of terrains.

Performance Metrics

Performance Metrics

135 kW

Rated Power

149 kN

Bucket Digging Force

11.8 r/min

Swing Speed

Technical Specifications

Operational Parameters

Parameter	Value
Operating Weight	21900 kg
Bucket Capacity	0.8-1.3 m ³
Rated Engine Speed	2050 r/min
