

Intelligent Robot Vacuum Cleaner with LCD Screen

This intelligent robot vacuum cleaner efficiently cleans carpets and hard floors, removing dirt, debris, and pet hair. It is equipped with features such as a LCD screen, multiple cleaning modes, and obstacle avoidance.

Overview

Intelligent Robot Vacuum Cleaner

This advanced robot vacuum cleaner delivers a comprehensive floor cleaning solution for both carpets and hard surfaces. Equipped with a versatile cleaning system, it features side brushes, main brushes, and a built-in UV lamp to ensure thorough sanitization. Designed for ease of use, it operates autonomously with an LCD screen for status monitoring, automatic charging capabilities, and a space-isolator function to define cleaning boundaries.

Key Features

Integrated Features	UV Sterilization, Auto-Charging, Space Isolator, Remote Control, Mopping Function, Cliff Avoidance
---------------------	--

Performance

Operational Noise	55 dB
-------------------	-------

Design

Device Thickness	8.7 cm
------------------	--------

Technical Specifications

Detailed Functionality

Feature	Description
Remote Range	Up to 10 meters
Charging Mode	Automatic
Cleaning Versatility	Sweep and mop combined
Safety Sensors	Stair avoidance and non-marring bumper
