Product Overview

Intelligent Water Softener Valve

This intelligent water softener valve is designed for high-performance residential and commercial water treatment systems. It features a versatile HD LCD display with multi-language support and offers advanced control options including both background and foreground operation modes. Engineered for flexibility, it supports both up-flow and down-flow configurations and integrates seamlessly with chlorine disinfection devices and automatic bypass valves to optimize water quality and salt consumption.

Control & Interface

Display Interface	HD LCD Display
Language Options	Yes
Operation Modes	Background Mode, Foreground Mode

System Compatibility

Flow Configuration

- Up-flow
- Down-flow

Integration Features

Chlorine Disinfection Compatible • Automatic Bypass Valve

Hardness Control	Automatic mixing of hard and soft water via bypass valve
