

Interactive Children's Painting System with Magic Pen

Interactive children's painting system designed to stimulate creativity and imagination. It features a large display and a 'Magic Pen' input device.

Product Overview

Interactive Creative Experience

This interactive painting system transforms traditional drawing into a dynamic digital experience, covering an impressive 10 square meters. Designed for children aged 3-8, it encourages creativity by allowing users to bring their painted characters to life on a large screen. The system promotes engaging parent-child interaction, making it a highly attractive feature for indoor playgrounds, shopping malls, and children's centers.
