

Interchangeable Disc Angle Grinder

This angle grinder is designed for grinding and cutting applications with a 4"/5" (100/125mm) disc diameter. It features a robust motor for reliable performance and a compact design for easy handling.

Product Overview

Versatile Grinding and Cutting Performance

This interchangeable disc angle grinder is engineered for demanding grinding and cutting applications in metalworking and construction. Featuring a robust motor and a compact, ergonomic design, it offers reliable performance and easy handling for professional tasks. With support for both 4-inch (100mm) and 5-inch (125mm) discs, this tool provides the flexibility required for a wide range of project needs.

Technical Specifications

Compatible Disc Diameters

- 4 inch (100mm)
- 5 inch (125mm)

Primary Applications

Metalworking, Construction, DIY Projects, Grinding, Cutting
