Product Overview

High-Performance Modular Flooring

These multi-function modular gratings are designed to provide a durable, high-load, and anti-slip surface for demanding environments like car wash shops, repair centers, and workshops. With a focus on ease of installation, the system requires no special tools or adhesives, allowing for quick floor transformation. Engineered from 100% new raw materials, these tiles offer exceptional resistance to water, chemicals, and stains while supporting heavy loads.

Technical Specifications

Bearing Capacity

20 tons
