Product Overview

High-Performance Modular Flooring

These multi-function modular gratings are engineered for demanding environments, offering a high load-bearing capacity and superior anti-slip properties. Designed for quick, DIY installation without the need for adhesives or special tools, they effectively transform cold or uneven floors into professional-grade surfaces. With a focus on durability, these tiles are 100% UV stabilized, chemical and stain resistant, and feature an open-grid design for efficient water drainage.

Technical Specifications

Load Bearing Capacity

20 tons

Max Load

Safety & Performance

- Non-slip surface
- Waterproof
- Fireproof
- No toxic fumes
- Drainage-optimized design

Material Composition

100% New Raw Material, UV Stabilized, Chemical Resistant, Stain Resistant

Application & Usage

Recommended Applications

- Car wash and beauty shops
- Auto repair workshops
- Garages and parking lots
- Basements
- Industrial factory buildings
- Exhibition spaces
- Home yards

Maintenance

Easy Maintenance • Hassle-free

Installation Method

DIY Interlocking (No adhesives or special tools required)
