

Interlocking Nuts and Bolts Set

High-precision interlocking nuts and bolts designed for secure and reliable fastening in machinery and industrial applications. These components feature a durable metal construction with a polished finish, ensuring resistance to corrosion and wear.

Product Overview

High-Precision Fastening Solution

These interlocking nuts and bolts are engineered for secure and reliable fastening in demanding machinery and industrial applications. Featuring a durable metal construction with a polished finish, they provide excellent resistance to corrosion and wear. The set includes two cylindrical components designed for high-stress environments where dependable fastening is critical.

Technical Specifications

Design Features

- Interlocking mechanism
- Keyhole security feature
- Adjustable screw mechanism

Material & Finish

Durable metal with polished finish

Application Suitability

Machinery, Industrial, High-stress environments
