

Internal Circlip Pliers

These circlip pliers are designed for installing and removing internal circlips from holes. They are available in three sizes and feature textured grips for enhanced control.

Product Overview

Professional Internal Circlip Pliers

These bent-nose circlip pliers are engineered for the precise installation and removal of internal snap rings from holes. Designed for versatility, they are available in three distinct sizes to accommodate various mechanical requirements. With textured handles for enhanced grip and control, these tools are an essential addition to any automotive, mechanical, or industrial toolkit.
