

Internal Combustion Engine

This is a robust auto engine designed for various applications. Its compact design and sturdy construction make it suitable for powering machinery and equipment.

Overview

Robust Internal Combustion Engine

This internal combustion engine is engineered for durability and reliable performance across various industrial and machinery applications. Featuring a compact and sturdy metallic block construction, it is designed to withstand rigorous operational demands. The unit comes fully equipped with essential components, including an integrated fuel system and cooling assembly, ensuring immediate readiness for integration into your equipment.

Design & Construction

Engine Type	Internal Combustion
Build Features	Compact Design, Metallic Engine Block, Sturdy Construction

Components

Included Components

- Cooling Fan Cover (Red)
- Air Filter Assembly (Black)
- Fuel Lines
- Fuel Filters
