

Internal Combustion Engine

This is a modern internal combustion engine with a compact design. The engine is equipped with electronic fuel injection and ignition systems for precise control and improved performance.

Product Overview

High-Performance Combustion Engine

This modern internal combustion engine features a compact, lightweight aluminum alloy design optimized for efficient heat dissipation and performance. Equipped with advanced electronic fuel injection and a turbocharged intake system, it delivers precise control and reliable power output. Its robust construction makes it an ideal choice for demanding automotive applications requiring both efficiency and durability.

Power

Technical Specifications

| | |
|----------------------|-----------------|
| Displacement | 1498 ml |
| Intake Type | Turbocharged |
| Cylinder Arrangement | Inline (I-type) |
| Valves per Cylinder | 4 |

Features

| | |
|------------------|---|
| Key Technologies | Turbocharged, TGDI, Electronic Fuel Injection, Aluminum Alloy Block |
