

Internal Computer Data Cable

This flat cable assembly contains multiple conductors and is insulated with a gray material. A protective black sleeve on one end offers additional insulation and strain relief, making it suitable for internal computer connections and data transfer.

Overview

High-Performance Internal Data Connectivity

This flat cable assembly is engineered for reliable internal computer data transfer. Featuring a multi-conductor design with durable gray insulation, it ensures signal integrity within compact hardware environments. The assembly includes a protective black sleeve at one end to provide enhanced strain relief and insulation, making it a robust choice for complex wiring configurations.

Technical Specifications

Cable Type	Flat ribbon cable assembly
Temperature Rating	125 °C
Flammability Rating	VW-1

Compliance & Standards

Safety Certifications	E323650, E262021
-----------------------	------------------

Design Features

Construction Details

- Multi-conductor configuration
- Gray insulation material
- Protective black sleeve (strain relief)
- Flat profile for space-saving routing
