

International Purchasing and Logistics Solution

This solution streamlines international purchasing processes for businesses. It manages payments, supplier verification, quality control, and coordinated transportation.

Service Overview

Streamlined Global Sourcing

This solution provides an integrated platform for international purchasing and logistics, bridging the gap between overseas buyers and domestic suppliers. By centralizing the procurement process, it ensures efficient payment handling, rigorous supplier verification, and quality control. The service culminates in unified transportation and logistics management, simplifying complex international supply chains.

Process Workflow

Key Operational Stages

- Order acceptance and payment processing
- Domestic supplier enquiry and factory verification
- Quality control and inspection
- Centralized goods assembly
- Unified international logistics and transportation

Service Features
