

Interphone Paging Device

This is a high-performance interphone and pager device ensuring reliable communication. It features robust construction, high sensitivity, and clear audio transmission.

Overview

High-Performance Communication

This interphone paging device is engineered for reliable, secure, and efficient communication in demanding environments. Built with robust construction, it ensures durability while delivering high-sensitivity performance and crystal-clear audio transmission. It serves as an ideal solution for various professional applications requiring consistent connectivity.

Technical Specifications

Suitable Applications

Secure Communication • Professional Paging • Reliable Intercom

Device Type	Interphone Paging Device
Key Features	High Sensitivity, Clear Audio, Robust Construction
