

Interphone Paging System

This system combines interphone and pager functionalities for efficient communication. It supports multiple indoor units and door entry control.

System Overview

Professional Interphone Paging Solution

This comprehensive interphone paging system is designed for secure and efficient communication within residential or commercial facilities. The system supports multiple indoor monitors and outdoor stations, providing reliable door entry control. Engineered for versatility, it integrates seamlessly with electric locks and various power supply configurations to ensure robust performance and security.

Technical Specifications

Compatible Cable Types

- SYV75-5
- RVVP6X1.0
- RVV7X0.3
- RVV2X1.0
- RVV3X0.3

Supported Voltages

DC 12V, DC 18V

System Capabilities

Supported Components

Indoor Monitors • Outdoor Stations • Electric Locks • Network Interface Unit
