

Inverter DC Arc Welder MMA-400I

This compact inverter DC arc welder is designed for manual metal arc (MMA) welding. It features adjustable current and arc force controls, along with a digital display for current settings.

Product Overview

Professional Inverter DC Arc Welder

The MMA-400I is a high-performance inverter DC arc welder engineered for precision and reliability in manual metal arc (MMA) welding applications. Designed for industrial efficiency, this unit features adjustable current and arc force controls, ensuring consistent welding quality across a wide range of tasks. Its compact design and digital display make it a versatile and user-friendly solution for professional welding environments.

Technical Specifications

Mains Voltage	380 V
Frequency	50/60 Hz
No-load Voltage	67 V
Rated Input Capacity	18 kva

Performance Metrics

Key Performance Indicators

400 A

Max Output Current

60 %

Rated Duty Cycle

Output Current Range	40-400 A
