

Inverter DC Arc Welding Machine

This robust inverter DC arc welding machine is designed for heavy-duty welding applications. Its advanced inverter technology ensures stable and efficient welding performance.

Product Overview

Professional Inverter DC Arc Welding Machine

The WSM-400IGBT is a robust inverter DC arc welding machine engineered for high-performance welding applications. Utilizing advanced inverter technology, it provides stable and efficient performance across a variety of welding processes. Built with high-quality components, this unit is designed to withstand the rigors of industrial environments while offering the precision and reliability demanded by professional welders.

Key Features

Capabilities	DC Arc Welding, Inverter Technology, Industrial Grade, High Efficiency
--------------	--

Technical Specifications

Certification Badges

Industrial Standard • Heavy Duty

Model Identifier	WSM-400IGBT
Welding Type	DC Arc Welding
