

Inverter DC MMA MIG Welder

This inverter-based DC MMA (Manual Metal Arc) welder is suitable for welding metal plates with a thickness above 0.8mm. It features high welding speed and improved welding quality.

Product Overview

Professional Inverter DC MMA/MIG Welder

This versatile inverter-based welding machine is engineered for high efficiency and precise control in various metalworking applications. It features advanced voltage fluctuation compensation to ensure a stable current during operation, resulting in deep melting pools and minimal spatter. Designed for ease of use, it offers high welding speeds and reliable arc-starting, making it a practical choice for working with carbon steel, alloy steel, and mild steel.

Technical Capabilities

Performance Metrics

0.8 mm

Min. Plate Thickness

Compatible Materials

Carbon Steel, Alloy Steel, Mild Steel

Key Features

Operational Benefits

- High welding speed
- Improved arc-starting success rate
- Voltage fluctuation self-compensation
- Minimal spatter
- Deep melting pool capability
- Double-face molding support

Efficiency Status

High Efficiency • Cost Effective
