

Inverter DC MMA Welding Machine

This compact MMA welding machine provides good arc-striking and stable performance. It features high welding quality, a deep molten pool, and reliable effect with low energy consumption.

Overview

Professional Inverter DC MMA Welder

This high-performance inverter DC MMA welding machine is engineered for professional applications requiring precision and durability. Its compact and lightweight design ensures portability for various work environments, while advanced inverter technology provides stable arc characteristics and minimal spatter. Equipped with self-protection features against over-voltage and over-current, this welder delivers consistent, high-quality results with a deep molten pool.

Performance & Features

Key Capabilities

- Stable arc performance
- Excellent arc-striking capability
- Low spatter output
- High welding quality
- Deep molten pool penetration

Safety Protections

Over-voltage protection, Over-current protection, Anti-interference

Design

Physical Characteristics

1 Compact

Size Category

1 Lightweight

Weight

Model Identifier

WS-315
