

Inverter MMA Welding Machine

This Inverter MMA Welding Machine is designed for light to medium-duty welding. It features adjustable current control, thermal overload protection and is compatible with a range of electrode sizes.

Product Overview

Advanced IGBT Inverter Technology

This DC Inverter MMA welding machine utilizes advanced IGBT and single PCB technology to deliver high efficiency and energy savings. Designed for stability and performance, it features strong compensation capacity and resistance to voltage fluctuations. The unit is compact, lightweight, and easy to operate, making it suitable for welding various materials including low-carbon, high-carbon, and alloy steels.

Technical Features

Key Performance Metrics

1 Single

PCB Technology

Safety & Protection

Thermostatic Control, Automatic Over-voltage Protection, Automatic Over-current Protection, Fan Cooled

Compatible Materials

Low-carbon Steel, High-carbon Steel, Alloy Steel

Included Accessories

Included Components

- 1.2m welding cable with electrode holder
- 2.2m earth cable with clamp
- Hand-held shield with glass or welding glass
- Hammer/brush
