

Ionic Silicone Facial Cleansing Brush

This facial cleansing brush uses ionic technology to effectively remove impurities and improve nutrient absorption. It features two distinct zones with different silicone heads for deep or sensitive cleaning.

Overview

Advanced Ionic Facial Cleansing System

This professional-grade facial cleansing brush utilizes advanced ionic technology for both deep cleaning and enhanced nutrient absorption. Designed with two distinct silicone zones, it offers customized care for different skin conditions, effectively removing makeup and impurities while providing gentle exfoliation. With its ergonomic, waterproof design and multiple vibration modes, this device is an essential tool for a comprehensive daily skincare routine.
