

IP66 Waterproof Digital Caliper

This digital caliper provides accurate measurements in diverse settings. Its IP66 waterproof rating ensures reliability in wet or dusty conditions.

Product Overview

Professional Precision Measurement

These high-precision digital calipers are engineered for reliability in demanding industrial environments, featuring a robust IP66 waterproof rating that protects against water and dust ingress. Constructed from hardened stainless steel, they offer long-lasting durability and consistent accuracy for critical quality control and manufacturing tasks. The intuitive digital interface supports versatile measurement types including internal, external, depth, and step measurements, making it an essential tool for engineering professionals.
