

IP67 Digital Caliper

This digital caliper provides precise measurements in demanding environments. Featuring IP67 protection, it is resistant to water and oil.

Overview

Precision Measurement in Demanding Environments

This advanced digital caliper is engineered for high-precision measurement tasks, strictly adhering to the DIN862 standard. Featuring an IP67 protection class, it offers superior resistance to water and oil, making it highly reliable for industrial use. The design includes a 20% larger digital screen for enhanced readability and precision-ground beam surfaces that ensure smooth, consistent movement.
