Product Overview

Precision Measurement in Demanding Environments

This high-precision digital caliper is engineered for reliability in challenging industrial settings. Featuring an IP67 rating, it offers superior protection against dust and water, allowing for accurate measurements even when submerged in water or oil up to 1 meter deep for 30 minutes. Constructed from hardened stainless steel, this tool ensures both durability and corrosion resistance for long-term professional use.

Technical Specifications

Ingress Protection

IP67 • Dust Proof • Waterproof

Measurement Modes

- Outside Diameter (OD)
- Inside Diameter (ID)
- Step Measurement
- Depth Measurement

Battery Type

3V CR2030

Key Features

Auto Power On/Off, MM/Inch Conversion, Stainless Steel Construction

Performance

Submersion Limit

1 m

Max Depth

30 min

Max Time
