Product Overview

Optimized Lighting for Livestock

These IP67-rated 25W LED lights are engineered specifically for the demanding environments of modern pig farms. Their robust, waterproof construction ensures long-term reliability and stability, even in harsh agricultural conditions. By utilizing scientifically customized optics, these lights support the natural growth characteristics of livestock, helping farmers improve operational efficiency and maximize returns.

Technical Specifications

Power Consumption

25 W

Rated Power

Ingress Protection

IP67

Installation Features

- Daisy-chainable design
- Integrated connectors for easy installation

Performance Features

Performance Highlights

High Efficiency, Long Lifespan, Uniform Light Distribution, Shadow Reduction

Application

Pig farming and agricultural livestock facilities
