

IP68 Waterproof Circular Cable T-Connector

This IP68 waterproof T-connector is designed for splicing and connecting electrical cables in harsh environments. The circular design ensures a secure and watertight seal for applications such as outdoor lighting and industrial equipment.

Product Overview

IP68 Waterproof T-Connector

This IP68 waterproof T-connector is engineered for splicing and connecting electrical cables in demanding outdoor, industrial, and marine environments. Featuring a robust and durable construction, it provides superior protection against water, dust, and contaminants, ensuring a secure and watertight seal. Designed for reliability and ease of installation, this connector is resistant to corrosion and UV damage, making it an ideal solution for long-lasting outdoor lighting and equipment connections.

Technical Specifications

Ingress Protection Rating

IP68

Connector Configuration

Circular T-Connector

Suitable Applications

Outdoor Lighting, Industrial Equipment, Marine Environments, Electrical Cabling

Features

Key Features

- Waterproof and dustproof design
- Corrosion-resistant materials
- UV-resistant construction
- Secure circular locking mechanism
- Easy installation
