Product Overview

Industrial Metal Processing Solution

This high-performance machine integrates precision leveling and sheet cutting into a single automated unit designed for iron and galvanized metal sheets. Engineered for industrial metalworking, it ensures consistent material flatness and accurate dimensions for various fabrication requirements. The system utilizes advanced digital design and robust construction to deliver long service life and high-quality production outputs.

Technical Specifications

Primary Functions

Sheet Leveling, Metal Cutting, Profile Processing, Automated Production

Commercial Terms

Payment Terms

- 30% Down Payment via T/T
- 70% Balance paid after inspection before delivery

Warranty

12 months limited warranty

Support & Services

Service Offering

- On-site technician assistance for installation
- Operational training
- Local technical support
- Free replacement parts during warranty (buyer pays shipping)

Technician Daily Rate

80 USD

Daily Service Fee
