

Irregularly Shaped Industrial Magnets

Irregularly shaped magnets designed for industrial applications. The assortment includes ring magnets with non-circular inner cutouts, small cylindrical magnets, and rectangular magnets.

Product Overview

Industrial Magnetic Solutions

These irregularly shaped industrial magnets are engineered for specialized applications requiring custom magnetic configurations. The assortment includes ring magnets with non-circular inner cutouts, small cylindrical units, and rectangular components. Designed for versatility, these magnets are suitable for integration into various machinery and industrial systems where standard shapes may not suffice.

Physical Characteristics

Special Features

Non-circular inner cutouts • Custom geometry

Available Shapes

Irregular Ring, Cylindrical, Rectangular

Applications

Typical Industrial Applications

- Custom machinery integration
- Specialized industrial equipment
- Custom magnetic assembly solutions
