

Irrigation System Wheel Drive with Dual Output

Heavy-duty wheel drive designed for agricultural irrigation systems. It features a robust gearbox with dual output shafts for efficient power transmission. Constructed from durable materials for long-lasting performance in demanding environments.

Product Overview

Heavy-Duty Irrigation Wheel Drive

This robust wheel drive is engineered specifically for agricultural irrigation systems, including center pivot and lateral move configurations. It features a high-performance gearbox equipped with dual output shafts to ensure efficient and reliable power transmission. Built to withstand demanding field environments, this unit is constructed from durable materials to provide long-lasting service life.
