

ISF3.8 Engine Cylinder Head

The ISF3.8 cylinder head is a crucial engine component housing the valves and combustion chamber. It is engineered to withstand high temperatures and pressures for efficient performance.

Product Overview

Engine Performance Component

This cylinder head is a vital component for the ISF3.8 engine system, engineered to house valves and combustion chambers while managing intake and exhaust processes. Constructed from high-quality steel, it is designed to withstand intense thermal and mechanical pressures to ensure efficient engine operation. Its precision engineering promotes optimal heat dissipation and reliable sealing, making it a dependable choice for engine maintenance and performance optimization.

Technical Specifications

Part Number	5258274
Material	Steel
Compatible Engine	CUMMINS Isf3.8

Physical Dimensions

Dimensions

61 cm Length	20 cm Width	34 cm Height
------------------------	-----------------------	------------------------

Weight	39.6 kg
--------	---------

Commercial Details

Quality Grade
Aftermarket

Warranty Period	12 months
-----------------	-----------

Logistics

Packaging

- 1 piece per box
- Wooden Box

Available Shipping

By sea, By air, By express
