

Islamic Cultural Center Architectural Model

This is an architectural model of the Islamic Cultural Center. It features the building's distinctive design elements, including arched walkways, a prominent dome, and a minaret.

Product Overview

Islamic Cultural Center Architectural Model

This architectural model faithfully replicates the iconic Islamic Cultural Center in Mali, capturing its distinctive design elements such as the arched walkways, prominent dome, and minaret. The design emphasizes traditional Islamic architectural motifs and blends light-colored structural walls with striking green accents. Designed to highlight the scale and environmental integration of the original structure, this model is an excellent representation of heritage-inspired architecture.
