

ISO 30 ER32 CNC Tool Holder

This balanced ISO 30 tool holder is designed for ISO 30 taper systems. It is used for wood-working auto tool changer CNC routers.

Product Overview

High-Precision ISO30 Tooling

These high-precision CNC tool holders are engineered specifically for demanding woodworking applications. Designed for compatibility with standard spindles, they feature a robust covernut and retainer knob system to ensure secure, reliable tool clamping. Available in multiple lengths, these holders are essential for maintaining accuracy and efficiency in CNC routing operations.

Technical Specifications

Available Lengths

- 42mm
- 50mm
- 60mm

Taper Standard	ISO 30
----------------	--------

Collet Type	ER32
-------------	------

Features

Application

CNC Woodworking • CNC Routers

Included Components	Covernut, Retainer Knob
