

ISO2858 Standardized Centrifugal Pump

This standardized pump is engineered for efficient fluid transfer. Its robust construction ensures durability and resistance to corrosion.

Overview

High-Performance ISO Standardized Pump

The PISO Series is a versatile centrifugal pump engineered to meet strict international standards, including ISO 2858 and ISO 5199. Available in both Heavy Duty and Standard Duty configurations, this pump is designed for reliability across demanding industrial sectors such as water supply, HVAC, and fire protection. Its robust construction and standardized design ensure easy maintenance, longevity, and broad compatibility for professional fluid transfer applications.

Performance

Key Performance Metrics

2000 m3/h

Max Capacity

150 m

Max Head

16 Bar

Standard Pressure

Operating Speeds

- 580
- 740
- 980
- 1450
- 2900
- 3500

Technical Specifications

Connection Sizes	Inlet: 50-350mm Outlet: 32-300mm
Compliance Standards	ISO 2858, ISO 5199
Bearing Brand	NTN (Japanese)

Construction Materials

Component Materials

Component	Standard Material
Casing	Cast Iron
Impeller	Cast Iron / SS304
Shaft	Stainless Steel 420
Wear Ring	Cast Iron / Stainless Steel

Shaft Sealing

Mechanical Seal • Gland Packing
