Product Overview

Versatile Italian Standard Switching

This 16A 2-way wall switch features a modern, square-shaped design suitable for diverse residential electrical applications. Engineered with high-quality flame-retardant PC and conductive phosphor copper, it ensures both safety and durability. Its modular structure allows for flexible assembly, while the sleek finish options provide aesthetic adaptability for any interior.

Technical Specifications

Rated Current

16 A

Rated Current

Operational Lifespan

Component	Cycles
Switch	40000
Socket	10000
