

Jerrican Lifting Clamp

This metal clamp is designed for lifting and transporting jerricans. It features a locking pin and top loop for secure handling.

Product Overview

Professional Jerrican Handling

The Jerrican Lifting Clamp is an engineered solution designed for the safe lifting and transport of standard jerricans. Its robust metal construction ensures reliability in demanding industrial environments, while the specialized curved design provides a secure grip on the container. Equipped with a locking pin and a top suspension loop, this clamp facilitates efficient and stable material handling, reducing the risk of accidental drops or spills during transit.

Technical Specifications

Finish	Orange-painted metal
Safety Features	Locking Pin, Secure Grip Design, Suspension Loop
Application	Lifting and transport of jerricans
