

Jet and Huller Rice Mill

The Jet and Huller Rice Mill efficiently processes rice grains using jet and huller technologies. It is suitable for agriculture and food processing applications.

Product Overview

High-Efficiency Jet and Huller Rice Mill

The LNJ Series Jet and Huller Rice Mill is an advanced agricultural processing solution designed to meet modern market demands. This equipment integrates jet and huller technologies to ensure efficient rice processing while adapting to varying paddy qualities, moisture levels, and impurity contents. It is a robust choice for agricultural and food processing facilities seeking reliable, high-output milling performance.

Technical Specifications

Model Performance Comparison

Model Type	Capacity (t/h)	Power (KW)
LNJ-150-1	1.3-1.8	22
LNJ-150	1.0-1.3	18.5
LNJ-115-1	0.7-0.9	15-18.5
LNJ-115	0.7-0.9	15-18.5
LNJ-80-1	0.7-0.9	15-18.5
LNJ-80	0.7-0.9	15-18.5

Suitable Industries

Agriculture, Food Processing, Rice Milling
