

Jet and Huller Rice Mill

This series of jet and huller rice mills combines jet milling and hulling techniques. It is designed for efficient rice processing in agricultural applications.

Product Overview

Efficiency in Rice Processing

The Jet and Huller Rice Mill is a specialized agricultural machinery designed to streamline rice processing operations. This series combines advanced jet milling and hulling techniques to ensure high-quality output. Engineered for reliability, these mills are suitable for various agricultural applications, offering scalable performance to meet different production needs.

Technical Specifications

Performance & Power

Model	Output (kg/h)	Equipped Power (kW)
LXNJ-80	600-700	15
LXNJ-115	900-1100	18.5-22
LXNJ-150	1000-1500	22-30

Available Models

LXNJ-80, LXNJ-115, LXNJ-150
