

Jetta Vehicle Rear Shock Absorber

This rear shock absorber is designed for Jetta vehicles. It provides enhanced stability, improved handling, and a smoother ride experience.

Product Overview

High-Performance Rear Shock Absorber

This rear shock absorber is precision-engineered specifically for Jetta vehicles to restore original suspension performance. It is designed to provide enhanced vehicle stability, improved handling, and a smoother ride experience. By effectively damping vibrations and reducing road noise, this component ensures optimal control and comfort for the driver.

Technical Specifications

Application	Rear Suspension
Vehicle Compatibility	Jetta

Key Features

Performance Benefits

- Enhanced vehicle stability
- Improved handling characteristics
- Smoother ride quality
- Reduced road noise and vibration
- Direct fit for easy installation
