

# Jigsaw Puzzle Cutting Machine

This jigsaw puzzle machine cuts steel rule dies used in the printing and packing industries. It is designed for creating jigsaw puzzles of varying sizes and piece counts.

## Overview

### Professional Jigsaw Puzzle Cutting Solution

This high-performance cutting machine is engineered specifically for the printing and packaging industry to produce high-quality jigsaw puzzles. It features a robust cutting mechanism capable of handling large puzzle formats up to 60x80cm, supporting up to 1500 pieces. The system is versatile, accommodating various steel rule dies for standard and custom puzzle shapes, ensuring precision and consistency for every production run.

## Technical Specifications

Processing Width	30 inch
Maximum Puzzle Capacity	60 x 80 cm (1500 pieces)
Power Rating	2200 W
Power Supply Options	220V, 380V, 110V, Single Phase, Three Phase

## Compatible Die Formats

### Standard Die Configurations

Format	Piece Count
60x80cm	1500
50x75cm	1000
A1	1200
A1	1000
48x68cm	1008
40x60cm	360

### Special Shape Capabilities

- Heart shape: 200x175mm (34pcs)
- Heart shape: 30x26cm (80pcs)
- Oval: 83x62mm (103pcs)
- Round: 30x30cm (120pcs)

## Customization

### Custom Design Support

While the machine supports a wide range of standard industry sizes, custom die manufacturing is available. We can produce designs tailored to specific customer requirements, including unique dimensions and piece counts.
